**LIFTINGS**

Country: GABON  
Terminal: FSO Mayumba operated by Perenco Gabon Oil & Gas SA  
Location: Offshore 230 miles south east of Cape Lopez  
Loading Restriction: Terminal accepts vessels up to 150k DWT  
Loading Rate: 3,500 m³/hour – loading done in tandem  
Cargo Size: 100,000 bbl to 350,000 bbl subject to +/- 5% tolerance  
Note: No draft restriction, Aframax and Suezmax

**CRUDE OIL CHARACTERISTICS**

**General**  
Lucina is a low sulfur, paraffinic, medium grade Crude Oil with high yields of Mid-distillates of excellent properties and Naphtha suited for reforming.

**Naphtha**  
Reformer Naphtha has N+2A excellent for reforming feedstock whereas the Light Naphtha has good paraffin content suited for isomerization.

**Kerosene**  
Suited feedstock for Jet Fuel, with a remarkably high smoke point.

**Gas Oil**  
Remarkably high cetane index, low pour point and very low sulfur content makes it an excellent Diesel source.

**VGO**  
Paraffinic nature makes it perfect for catalytic cracking feedstock.

**Residue**  
Makes high quality Fuel Oil with low vanadium and less than 0.2 WT% sulphur. The Vacuum Residue has an excellent wax yield.
